Jain Solar Water Heater (ETC type)

Warranty The Jain Sunlight Solar Water Heating Systems are backed up by a warranty of 5 years against manufacturing defects subject to the conditions stipulated therein.

Frequently Asked Questions (FAQ's)

How does the water get heated in ETC system?

It is a natural process in which Solar energy is absorbed by the black coating on the outside of the inner tube & the same is transferred to the water inside the tube. Water on the upper side of the vacuum tube becomes hot & lighter in weight & it starts rising up into the tank. At the same time, heavier cold water from the tank comes downward from lower side of the tube. This cycle repeats till all the water is heated so long as solar radiation is available.

What is the maximum temperature achieved?

Domestic systems are designed for temperature upto 60°C. However, in summer or during periods of less use, higher temperatures can be achieved.

How do we select the capacity?

For Indian conditions, 25 to 30 liters per person per day is the average hot water use. Accordingly, 100 LPD system is suitable for a family of 3-4 members.

Any maintenance required?

Use soft water & keep the glass tubes always clean. Check for leakages & valve functioning periodically. Keep in mind that this system is meant for non-pressurised application only. Air vent to the hot water tank is MUST.

What if the water is hard?

Periodically, clean the tank & tubes for any scale buildup.

How about soft loan scheme?

Soft loan is available for 5 years repayment period. Interest rate is 2% for individuals, 3% for non-profit making & 5% for profit making or ganisations.

Comparison

Feature	Flat Plate Collector	Evacuated Tube Collector
Front View		
Absorber	9 nos. of selective Coated copper fins and riser tubes.	No Copper fin & rise tube. Inner surface of glass tube has Al-N/Al Coating.
Type of glass	4 mm thick toughened glass.	Borosilicate glass tube.
Pressure withstanding capacity	Good, up to 6 bar	Cannot withstand pressure of more than 0.3 bar due to glass rubber joint.
Capacity to absorb both Direct & indirect radiations	Yes	No
Net absorber area (for 100lit) M ²	1.95	1.23
Height (100LPD)mm	1800	1300
System Area	1.3 m x 2.3 m	1.3 m x 1.7 m
ISI certification	Yes	No
Maintenance	Easy	Careful
Serviceability	Yes	Yes
life	Above 10 years	Upto 10 years.
Efficiency	51%	31.60 %
