Professional Activity

Session on Establishing Career in Software Industry: A corporate vision

Program: Establishing Career in Software Industry: A Corporate Vision

Date conducted on: 15/08/2020

Platform: Google Meet

In a world progressively run by computers, wherein improvement depends on software. The software professionals roles are changing constantly and gaining new extents. In profitable software development as well as scientific research environments, the way software professionals are perceived is changing, because they are more important to the business than ever before. These days, their job requires skills spreading outside the fixed job description posted by HR, and more is expected. To advance and thrive in their new roles, the software professionals must hold change, and practice the refrains of the new age (integration, collaboration and optimization). The challenges may be somehow scary for freshly passed out software professionals. This session will help students to explore their career in corporate world. They will able to understand the IT corporate culture in all respect.
