

4 Courses

Enterprise System Management and Security

Windows Server Management and Security

Linux Server Management and Security

Planning, Auditing and Maintaining Enterprise Systems

06/15/2020

PARESH PANDURANG MHATRE

has successfully completed the online, non-credit Specialization

Computer Security and Systems Management

The System Management and Security Specialization focuses on computing in an enterprise environment. Combining both theory and real world experience and architecture, the courses will prepare you to design and audit secure enterprise systems. The courses will cover practical use of major server operating systems in an enterprise environment and how to design and operate them securely.

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
